TrailTrack

Real-time trail conditions and community walks for Ireland

Iteration 1 | Release v0.1 | October 2026

The problem

Mud, flooding, fallen trees and forestry work can change a trail overnight, but walkers plan around information that is often out of date. Group walks are arranged across club websites, social media and group chats, with no single place to find one. Patchy signal on hills and in forests makes both harder.

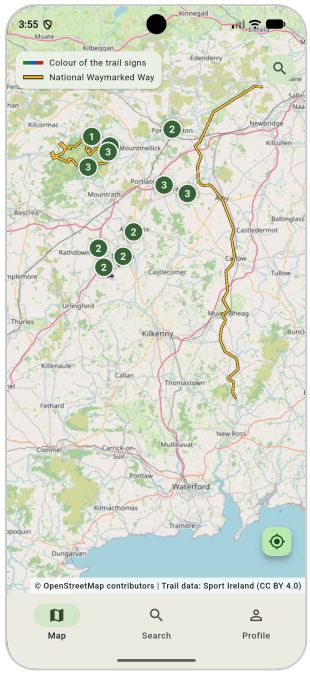

What TrailTrack does

Official trail data
Routes from the Sport Ireland National Trails Register.

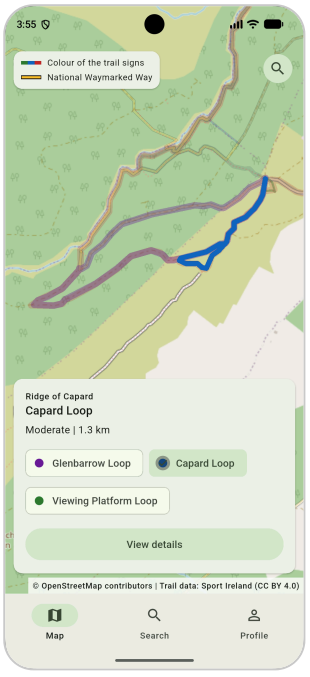

Free condition reports
Walkers report what they find. Anyone can read it.

Community walks
Organise and join group walks on a trail. Coming in v0.2.

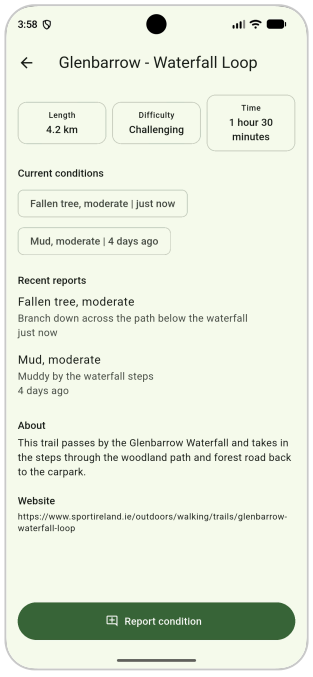

The app in v0.1

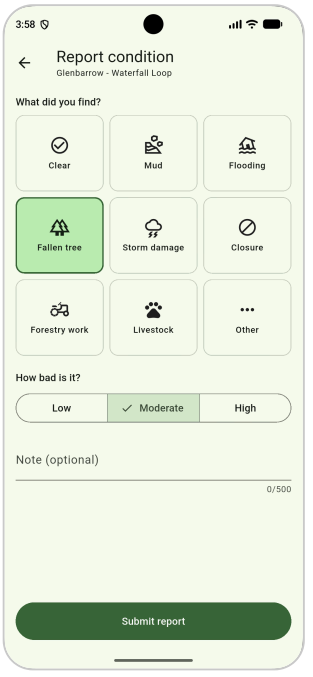

The map
Routes in their trail sign colours, with pins for each site.

A selected route
Chips switch between the routes at a site.

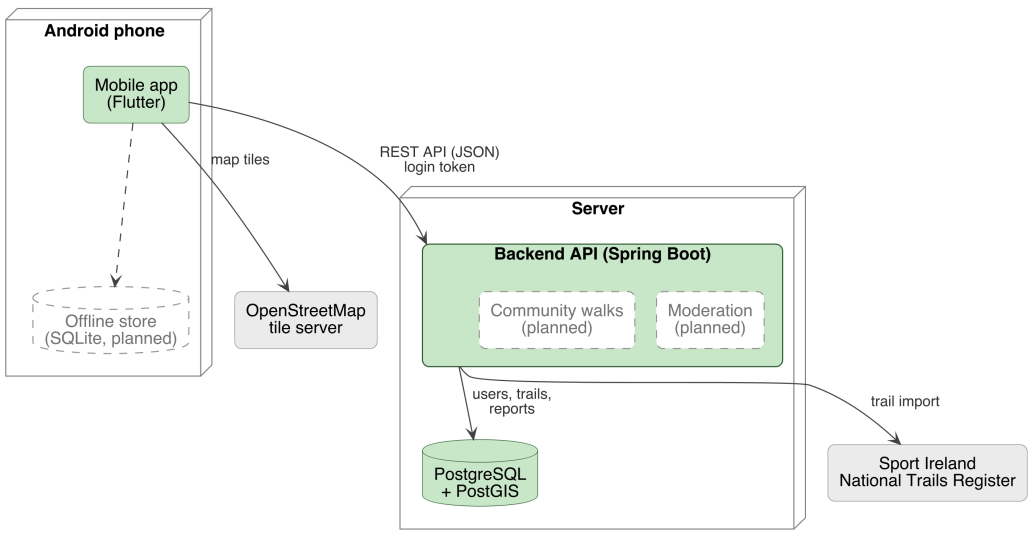

Trail details
Current conditions and the last 7 days of reports.

Report a condition
What you found, how bad it is, and a note.

Architecture

28 trails imported

13 trail sites

70 backend tests

101 app tests

Flutter · Spring Boot 4 · Java 21 · PostgreSQL · PostGIS · flutter_map · OpenStreetMap

Built in v0.1 · Planned for later iterations

In v0.1

- ✓ The 28 County Laois trails imported from the register
- ✓ Map with routes in their sign colours, grouped into sites
- ✓ Accounts: register, log in, stay logged in
- ✓ Trail details with current conditions
- ✓ Condition reports: 9 condition types, severity and a note
- ✓ Search by name, or near me within 5, 10 or 25 km

Coming next

v0.2 Dec 2026 — Community walks: create, browse and RSVP. Live conditions on the map and hazard pins.

v0.3 Feb 2027 — Reports queued offline and sent on reconnect. Moderation rules and verified trail maintainers.

v1.0 Apr 2027 — Testing, polish and the final report.
